FULL BODY IMAGE SET

---

---

## ■ Introduction

“FULL BODY IMAGE SET” (hereinafter referred to as "this software") is a product created by Gotcha Gotcha Games Inc. and is a collection of assets containing graphic data that can be used in the game production support software "Maker" series.

## ■ About this content

FULL BODY IMAGE SET is a collection of full body illustrations of the default characters of "RPG MAKER UNITE". It includes 70 full body png files and psd files are included for easy modification by users.

## Contents

- Pictures 70 (png, psd)

## ■ System Requirements

System supporting "RPG MAKER UNITE".

## ■ How to use this software

This section explains how to use the assets in the collection.

### < For the Unity Asset Store version >

1. Start the "RPG MAKER UNITE" editor and open the project to which you want to add assets.
2. Open the asset page in the Unity Asset Store and click the Open in Unity button.
3. The Package Manager window will open, displaying information about the asset. Download and click the Import button.
4. The Import window will appear. Click "Import" in the lower right corner of the screen to import this collection of assets in a batch.
5. The Import window will appear, which allows you to reference the assets as Unite assets. Follow the instructions to import.

### < For the Steam version >

Please see below for import instructions.
